To whom it may concern,

I am a web developer with more than 6 years of experience with HTML5, CSS, and Javascript and I'd love to bring my expertise and enthusiasm to your Front-End Development team. My work building a web community and interactive web demonstrations at Social Psychology Network has empowered the network to continue their mission to promote peace and social justice through the education and advancement of psychology. I believe my experience and skill-set can be applied to CFPB's mission to protect American citizens in the consumer finance market.

After meeting with Adam Scott, a current CFPB Front-End Developer, I found the toolset and technical direction of the CFPB front-end team largely matches my own skill-set. As a contributor to open source projects, and belief in its ability to move the web platform forward, I am thrilled to find out that much of CFPB's written code is open source.

As there is considerably more to relate, I look forward to meeting with you and discussing how I might contribute to the Front-End Development team.

Best Regards,  
Steve Farthing
